TO WHOM IT MAY CONCERN

In connection with CSIR-CMERI technology "Community Level Arsenic Removal Filter (Model-II)" received by M/s Harambh Chemicals Pvt. Ltd., Varanasi, UP on June 6, 2019, the adsorbent was used mixed metal-oxides (copper oxide, iron oxide) activated rice husk char nanocomposites for removal of arsenic from contaminated water. Thus, the "Community Level Arsenic Removal Filter (Model-II)" is **nano adsorbent based water purification technology** useful for removal of arsenic.
